

Table 2. Comparison of the main differences between the REGICOR and SCORE tables³⁵

| | REGICOR | SCORE |
|---|---|---|
| Type of measure | Morbimortality | Mortality |
| Events included | Fatal or non-fatal or silent myocardial infarction, angina | Coronary death, cerebral vascular disease, peripheral arteriopathy, cardiac insufficiency, amongst others |
| Definition of high risk | >10% | >5% |
| Methodology | <ul style="list-style-type: none"> • Calibration of the equation based on a cohort study • Validated in our setting | <ul style="list-style-type: none"> • Equation based on a cohort study • Calibrated in our setting |
| Specific assessment of diabetic patients | Yes | No* |

* The SCORE equation considers them to be high risk.
